

Content Quality Audit Report

Master Landing Page — “MBA in Dubai / GCC” (Word draft, 17 pages)

File audited: uploads/master-landing-page-content.pdf (source: mba-IN-DUBAI-GCC.docx, author: Anoop Puri)
Audit date: 2026-09-09 | Auditor: QA & Review Agent (Agent 11), 11-agent LP pipeline
Standards applied: Landing Page Design SOP v1.0 (16-block spine), Gulf keyword plan K1-K6, brand messaging framework, CRO spec, claims & compliance rules, WCAG/SEO checklists

1. Executive Summary

The draft is a complete 17-page, ~4,500-word first pass that covers most of the intended blocks and is clearly aimed at the UAE/GCC market. However, it is NOT ready for design handoff or build. The main problems are: (a) mechanical writing defects — the word “programmed” is used as a noun 11 times, “programmes” is mistyped as “memes” on page 1, and several sentences are broken; (b) keyword stuffing — 60+ forced keyword phrases in 4,500 words, with the same “Online MBA in Dubai / UAE / GCC” triplet repeated verbatim in at least four sections; (c) the recognition story is missing — Ofqual, QUALIFI, University of Gloucestershire and IACBE appear ZERO times, so the page cannot answer the Gulf buyer's #1 objection (“is this recognised?”); (d) the page is only keyword-level GCC: no no-visa callout, no AED fee framing beyond one line, no weekend/Saturday-class angle, no Sharjah office, no intake urgency; (e) contradictory duration claims (10-12, 10-15, 12-18 and 8-18 months all appear); (f) two of the strongest proof sections (success stories, testimonials) are empty placeholder templates; (g) several unverified statistical claims (4,500+ students, 98.70% pass rate, 5-star reviews) and “best” claims that carry UK advertising-compliance risk.

Verdict

REVISE BEFORE BUILD. Overall score 5.0/10. Copyright review found NO evidence of direct copying (see §6). The draft should go back to the writer for one structured revision pass using the P0/P1/P2 plan in §8. The good news: the skeleton is 70% right, the keyword targets are mostly right, and the fixes are specific and bounded.

Scorecard

Structure & flow (SOP spine)		6.0/10
	Most blocks present; order & 4 key blocks missing	
GCC basis — Hero & Programme Overview		5.5/10
	Cities named; local experience (AED, visa, weekend, office) missing	
SEO & keyword usage		5.0/10
	Right targets, wrong execution: stuffing, 3 of 6 keywords under-served	
Word quality & grammar		4.0/10
	11× “programmed”, 1× “memes”, broken sentences, inconsistent terms	

Copyright / originality		8.0/10	No direct copying found; generic phrasing & internal repetition
CRO		4.5/10	8-field form, no WhatsApp rail, no urgency, “Apply Now” first touch
Trust, claims & compliance		4.0/10	Recognition anchors absent; 5 claims need evidence; “best” risk
OVERALL		5.0/10	Revise before build — P0 fixes are bounded and specific

2. Structure & Flow — mapped to the 16-block SOP spine

The draft is a content document (with [Add CTA]/[Add link] markers), so it is judged on block coverage, order and narrative logic — not pixel layout. Against the SOP spine (recognition → flexibility → speed → price):

#	SOP block	In draft?	Finding
0	Announcement bar / intake urgency	MISSING	No rotational-intake line anywhere (0 mentions of “intake”). Permanent honest urgency lost.
1	Sticky header + CTA	MISSING	Not specified (acceptable for content doc, but header CTA label should be fixed).
2	Hero: statement + form	PARTIAL	H1 + form present. Form has 8 fields (spec: max 6). H2 sits directly under H1 — hierarchy issue.
3	Trust / recognition strip	WEAK	Stats block present (4,500+ etc.) but it is a METRICS strip, not a RECOGNITION strip: no Ofqual/QUALIFI/university names up top. Recognition arrives only in §12 (late).
4	Problem / pain section	MISSING	No problem-agitation block. Page goes straight from hero to benefits — skips the pains the Gulf buyer has (fees AED 87k+, fast-track mills, attestation).
5	About / academy identity	MISSING	No “who we are” block (London HQ, Sharjah office, since 2012).
6	Programme overview	PRESENT	Present (H2 p.3). 5 H3s; 2 of 5 have zero local references — see §3.
7	Why choose us	PRESENT	7 H3s — one more than the recommended 6; “Proceed With Confidence” H3 is filler, delete.
8	MBA families / ladder	PRESENT	General / Specialised / Executive / Global MBA — good. Specialisations list is very long (24 items) — trim to 8–12 with links.
9	Master's by university	PRESENT	Rushford, GAU, Wolverhampton, UCA — good structure; awarding-body clarity missing (see §7).
10	People (founder/faculty)	MISSING	No named humans anywhere. In a trust-swamp market this is a major gap.
11	Success stories (before→after)	EMPTY	3 full [Student Name]/[Previous Role]/[Current Role] templates — no content written.
12	Testimonials	EMPTY	Pattern only (“Add 2-3 students testimonials”). Nothing written.
13	How it works / delivery	PARTIAL	“Learning That Fits into Your Life” covers delivery; no 4-step enquiry→enrol flow, no start-date story.
14	Fees	PRESENT	Good structure (table + AED range + CTA). Duration in table contradicts hero (see §4).
15	FAQ	PRESENT	12 Q&As — strong set, matches real queries. 2 grammar fixes needed (§4).
16	Final CTA + footer	PARTIAL	Final CTA present; footer (address, registration, legal) not specified.

Structural verdict

12 of 16 blocks present/partially present. The four that hurt most: (1) no Problem section, (2) no Recognition strip with named accreditations, (3) no People block, (4) empty proof sections. Also: move “University Partners & Recognition” earlier (right after Programme Overview) — the SOP message order puts recognition FIRST; in the current draft it is block 13 of 16. Two sections are mis-labelled or duplicated (“University Partners & Recognition/Trusted University Pathways...” is one H2 with two titles).

3. GCC Basis Check — Hero & Programme Overview (specific audit request)

The page must not merely contain the words Dubai/UAE/GCC — it must feel made for the Gulf: currency (AED), visa reality, weekend rhythms, local office, time zone, local sectors. Scored separately for the two requested sections.

3.1 HERO (page 1) — score 6/10: keyword-GCC yes, experience-GCC no

- **PASS** — Named markets: Dubai, Abu Dhabi, Sharjah, wider UAE + Saudi Arabia, Qatar, Oman, Bahrain, Kuwait.
- **PASS** — “Online MBA in UAE / Dubai / GCC” present; “working professionals” positioning clear.
- **FAIL** — No AED anywhere in the hero (first currency appears only in the fees section, page 10).
- **FAIL** — No “no student visa / no relocation” line — the single strongest GCC differentiator (K6) is absent from the whole document (0 occurrences).
- **FAIL** — No weekend/Saturday-class angle in the hero (appears only once, buried in an H3 on page 4).
- **FAIL** — No local presence (Sharjah office / Robot Park Tower), no WhatsApp-first rail, no time-zone mention.
- **RISK** — Duration claim “10-12 month / 1-year” conflicts with the fees table “10-15 months” and Exec MBA “12-18 months” — Gulf buyers compare hard; contradictions kill trust.

Fix: one hero sentence should carry the local stack — e.g. “Study from Dubai, Abu Dhabi or Sharjah — no student visa, weekend-friendly classes, AED instalments — with admissions in Sharjah and a London headquarters.” (One line. Five local signals.)

3.2 PROGRAMME OVERVIEW (page 3) — score 5.5/10: title is GCC, body is generic

- **PASS** — H2 “MBA & Master's Programmes Designed for Working Professionals in Dubai, UAE & GCC” — good.
- **PARTIAL** — “A Strong Learning Community” + “Case Work from Real Life” + “Made for Working Professionals” all carry at least one local mention.
- **FAIL** — “ASK Quotient Development” and “Skills- and Knowledge-Based MBA Learning” contain ZERO local references — fully generic international copy sitting inside a GCC page.
- **FAIL** — Specialisations are listed globally — none are framed against Gulf demand (real estate, hospitality, healthcare, energy/renewables, logistics — the sectors the UAE/GCC actually hire for).
- **RISK** — Local mentions read bolted-on at sentence ends (“...in real settings across Dubai, UAE and the GCC”) — this is keyword placement, not local writing.

Fix: add one local line per H3 (sector examples for Specialisations: “real estate, hospitality, healthcare, energy — where the Gulf hires”; for Community: “your cohort will include learners from Dubai, Riyadh and Doha”). Total ~50 words; changes the section from generic to local.

3.3 GCC coverage — whole document (counts)

Local signal	Occurrences	Verdict
Dubai / UAE / GCC (any)	50 / 66 / 37	Keyword-level coverage: PASS
Saudi/Qatar/Oman/Bahrain/Kuwait	10	PASS (good breadth)
Sharjah / Abu Dhabi	1 / 1	WEAK — Sharjah is the office city; it should appear in trust + footer + at least one body
AED (currency)	2	WEAK — should appear in hero, fees, and one CTA
visa / no-visa	0	FAIL — must be a named hero + FAQ element
weekend / Saturday classes	1	WEAK — a core selling point for 5-9 Gulf workers
WhatsApp	1	WEAK — should be a first-class CTA rail, not a form field
intake / rotational / start date	0	FAIL — no urgency mechanic, no start-date story

Local signal	Occurrences	Verdict
time zone (Dubai/UAE)	0	MISSING — “Dubai time zone” support line is cheap trust

4. SEO & Keyword Performance (K1-K6 plan)

Keyword (plan)	Plan role	Draft status	Count	Finding
K1 online MBA in Dubai	Primary	Over-used	16	Present everywhere — but forced into sentences that no human writes (see stuffing examples).
K2 MBA in UAE for working professionals	Proven cluster	Good	14	Best-handled keyword; keep density here.
K3 UK online MBA / UK-recognised	Credibility filter	MISSING	~0	UK universities are named (UCA, Wolverhampton) but the UK-recognition story (Ofqual/QUALIFI/UK-regulated) never appears. The Gulf buyer filters for “UK” — the page does not earn it.
K4 online MSc Dubai	Blue-ocean flank	Under-served	~3	MSc section exists but is titled “Master's Programmes by University” with no Dubai/online MSc phrasing.
K5 MBA in Sharjah	Local geo	MISSING	0	Sharjah appears once, in a city list. The office is in Sharjah — this keyword is ownable.
K6 no visa / without relocating	Cross-GCC rail	MISSING	0	Absence is a structural gap (see §3).

Keyword stuffing — the central SEO defect

60+ keyword phrases in 4,500 words (~1 per 75 words, vs a healthy ~1 per 150+). Ten different sentences open with “Whether you [are]...” + the same keyword triplet, and the identical line “Whether you're looking for an Online MBA in Dubai, Online MBA in UAE, Online MBA in GCC...” recurs verbatim in at least 4 sections. Verbatim self-repetition is the fastest way to trigger Google's duplicate/thin-content treatment and reads as spam to the buyer. Examples of unnatural sentences:

“Whether you are searching for an Online MBA in UAE, an Online MBA in Dubai, or a Master degree in UAE online, our program memes are designed to fit around your work...” (p.1 — also contains the “memes” typo)

“Connect with professionals exploring an Online MBA in GCC, flexible MBA programmes in Dubai, and postgraduate opportunities across the UAE.” (p.3 — a keyword list wearing a sentence's clothes)

“Whether you're researching Part-time MBA in Dubai fees or comparing flexible MBA and Master's options in UAE and GCC, our advisors can help...” (p.4)

Rule for the rewrite: each keyword family gets ONE home (H1/subhead for K1, fees section for “fees” variants, partners section for K3, MSc section for K4, footer + trust for K5, hero+FAQ for K6); elsewhere the copy says Dubai/UAE/GCC naturally. Target: cut keyword phrases by ~40%.

Heading structure & meta

- **PASS** H1 is fine (“Online MBA & Master's Programmes in UAE and GCC”) — 9 words, keyword-led.
- **FIX** An H2 sits directly under the H1 in the hero — that text is a subheadline, not a section; demote to <p>.
- **FIX** One H2 carries two titles joined by “/” (“University Partners & Recognition/ Trusted University Pathways...”).
- **MISSING** No meta title/description provided (spec: ≤60/≤155 chars). No JSON-LD plan (Course + FAQPage + EducationalOrganization).
- **FIX** Durations contradict across the page: “10-12 month/1-year” (hero), “10-15 months” (MBA fee row), “12-18 months” (Exec MBA row), “8-18 months” (MSc row), “10-12 months/1-year options” (comparison table). One source of truth per programme family — required before build.

5. Word Quality, Grammar & Mechanics

Voice is polite, clear and generally conversion-appropriate, but the draft has a systematic mechanical problem (“programme” → “programmed” as a noun, 11 times) plus a spread of smaller defects. All items below were found by full-text read and must be fixed before build:

Location	As written	Issue	Fix
p.1 hero	“our program memes are designed”	Critical typo — “memes”	“our programmes are designed”
p.4 / p.7 / p.8 / p.10 / p.11 (11×)	“Explore programmed designed...”, “Master’s programmed from...”, “Available programmed include:”, “1 year MBA programmed in UAE”, “the available programmed”	Systematic: “programmed” used as noun	“programmes” (every occurrence)
p.4	“there is more to your educational.”	Sentence ends without a noun	“...there is more to your education.” or “...educational journey.”
p.4	“You need not have to deal solely with everything.”	Double-negative/awkward	“You don’t have to do it alone.”
p.3	“Learn the skill to Ask, Seek, and Know.”	Broken construction; also “help you make” agreement	“Learn to Ask, Seek, and Know.” / “...and helps you make better choices.”
p.7	“Boost your leadership and management path”	Fragment under H3 (no verb complement)	“Strengthen your leadership and management path.”
p.7	“This pathway is handled by University for the Creative Arts, UK + Rushford Business School, Switzerland, based on what is available and what you meet in the admission rules.”	Unclear who awards the degree; “what you meet in the admission rules”	State the awarding body explicitly: “Awarded by [X], in partnership with [Y]. Entry routes confirmed at admission.” (see §7)
p.10	“from AED 16000 TO AED 40000”	Formatting + claim	“typically AED 16,000–40,000” (after client confirmation)
p.9 (image note)	“11.2 Average Work Experience” / “98.70 % Programme Pass Rate” / “979 MBA Students”	Missing units; odd precision; unverified stats	“11.2 years average experience”, “98.7% pass rate” — all four stats need client verification before publish
p.11	“Students From a Range of industries”	Capitalisation	“...Range of Industries”
p.14	“[Add 2 3 students testimonials...” / “After 3 4 testimonials”	Missing hyphens	“2–3” / “3–4”
whole doc	“programmes” vs “programs” mixed (3×); “Master degree” vs “Master’s” mixed	Terminology drift	Standardise: “programmes” (UK), “Master’s”
p.7	“Finance, Marketing” (in General MBA Key Areas list)	Missing “and”	“Finance & Marketing”

Location	As written	Issue	Fix
p.15 FAQ	"What is the Online MBA in UAE fees?"	Grammar	"What are the fees for an Online MBA in the UAE?"
whole doc	"subject to programme availability and applicable requirements" (3× verbatim + variants)	Legalistic hedge repeated — kills tone	Keep once in the fees section; delete elsewhere

Readability

Average sentence length is acceptable (12–18 words); Flesch reading ease in the 60–70 band (fine for UK/GCC professional audience). The real readability killer is the stuffing pattern in §4 — several 30+ word sentences that are keyword lists. Tone consistency: 80% of the doc is good plain-English; the remaining 20% (hero p.1, "Finding the Right Programme" intro, FAQ p.15) is where the stuffing is densest.

6. Copyright & Originality Review

Method

Full 17-page text extracted (pypdf). Distinctive multi-word strings were spot-checked against live web pages (search engines) and against the client's own live site content (full-text grep of all blade/markdown assets in the repository). Education-industry stock phrases were compared against known premium-provider copy patterns.

Findings

Checked string	Source checked	Result
"Learning That Fits into Your Life" (H2, p.13)	Capella, CGU, UMD and similar pages	NO verbatim copy. However, "fits your life / fit your life" is an industry-standard construction (Capella: "fit higher education into your life"; CGU: "a program that fits your life"; UMD: "fitting into your life"). Generic — safe, but not original. Consider a distinctive alternative (e.g. "Built Around a 5-9").
"Build Your Career Without Pressing Pause" (H2, p.1)	Web-wide	NO matches found — appears original. Keep.
"Talk about what you are learning, swap your own lessons from work, and grow contacts that may help you over the long run." (p.3)	Web-wide	NO verbatim match (only thematically similar networking content). Safe; phrasing is slightly awkward — polish, don't replace.
"Trusted by Aspiring Professionals. Backed by Experience." (p.2)	Web-wide	NO verbatim match found. Safe.
Testimonial quote templates (p.12-13)	n/a — templates	Empty templates; no copying risk. Must be filled only with permissioned, verbatim customer quotes before publish.
Internal duplication vs live site (mba-masters-landing, UAE guide, homepage sections)	Full-text grep of repository	NO overlapping phrases found with the live site copy — the draft is fresh, not recycled.
Internal self-repetition (within the draft)	Whole document	The "Whether you're looking for an Online MBA in Dubai, Online MBA in UAE, Online MBA in GCC..." block repeats VERBATIM in ≥4 sections; "subject to programme availability..." 3x. Not a copyright issue, but a quality/SEO issue (see §4).

Copyright verdict: LOW RISK

No evidence of verbatim copying from competitors or the client's own site. The realistic originality risks are (a) generic industry phrasing that makes the page blend into every other UAE MBA page (weakness of voice, not a legal risk), and (b) the stat/claim items in §7 — a "98.70% pass rate" attributed to the academies must match what the awarding universities actually publish, otherwise it is a misrepresentation risk, not a copyright one. Recommendation: before publish, run the final copy through a plagiarism tool (e.g. Copyscape) as a cheap insurance step — but on the evidence available, no rewrite-for-infringement is required.

7. Trust, Claims & Compliance

7.1 The missing recognition story (largest trust gap)

Counts in the draft: Ofqual = 0 · QUALIFI = 0 · University of Gloucestershire = 0 · IACBE = 0 · “since 2012” = 0 · “England & Wales registered” = 0 · Robot Park Tower/Sharjah office = 0. The partners section (p.14) lists four universities but never says what regulates the diploma route or what “recognised” means here. In a market full of fast-track mills, this is exactly where the page must out-trust the competition — and it currently says nothing. Fix: add the Recognition strip (named: Ofqual-regulated QUALIFI route; university-awarded degrees; GAU's IACBE/YÖK/YÖDAK; London HQ + Sharjah office; since 2012) right after the hero.

7.2 Unverified / risky claims (must resolve before publish)

Claim (location)	Risk	Required action
“4,500+ students supported, 1,500+ alumni graduated, 10+ university partners, 120+ corporate events” (p.2, p.3)	Unsubstantiated stats — ASA/ASA-equivalent risk; “students supported” is ambiguous (enquiries? enrolments?)	Client to provide source data; tighten wording (“supported” → “enrolled/completed” as true); or remove
“5-Star Reviews Across Leading Platforms” (p.3)	Vague proof claim — which platforms? screenshots?	Name the platform + link, or replace with a verifiable rating
“98.70 % Programme Pass Rate”, “979 MBA Students”, “77 Countries”, “33.7 Average Age” (p.9 image note)	High-precision stats must match university/internal records exactly; “979” reads oddly (use 979 or “970+”)	Verify against records; round sensibly; date-stamp the data
“AED 16000 TO AED 40000” fee range (p.10)	Fee claims contradict the same page's “fees vary by university” rows; unconfirmed	Client sign-off on the range + which families it covers; format AED 16,000–40,000
“best” — 6 occurrences (“Best recognized MBA in UAE”, “Choose the best MBA in Dubai...”, “top MBA colleges in Dubai...”, “Best Suited For”)	Superlative self-ranking claims — UK advertising-code risk (ASA/UCO) when self-referential	Delete self-referential “best”; keep only “best suited for” (descriptive) and reframe the SEO section as “a recognised MBA in UAE”
Global MBA “handled by University for the Creative Arts + Rushford Business School” (p.7)	Awarding-body ambiguity — WHO confers the degree? Critical for recognition trust	State: “degree awarded by [X]” explicitly per route
GAU listed without its accreditations (p.8)	Missed trust; GAU carries IACBE/YÖK/YÖDAK	Add the three accreditations next to GAU
Testimonials & success stories (p.12-14)	Placeholders today	Only permissioned, named, verbatim quotes; re-confirm titles/permissions
“Recognised” usage throughout	Must stay precise: regulated diplomas ≠ university degrees	Adopt the framework wording: “UK-recognised (Ofqual/QUALIFI)” for diplomas; “university-awarded” for degrees

7.3 CRO audit

Element	Draft	Standard	Fix
Hero form field count	8 (name, email, phone/WhatsApp, country, programme, specialisation, qualification, start timing)	Max 6 + 1 optional	Drop “Highest Qualification”, “Preferred Specialisation”, “When to start” → move to the 15-min call. Keep: name, phone/WhatsApp, email, programme, country. (Country is a good Gulf-specific keeper.)

Element	Draft	Standard	Fix
CTA labels	"Apply Now", "Speak to an Advisor", "Request Fee Details", "Get Programme & Fee Details"	First touch never "Apply Now" (implies a decision the page hasn't earned)	Primary: "Start my enquiry" or "Get my programme & fee plan"; keep "Speak to an Advisor"; demote "Apply Now" to the post-call flow
WhatsApp rail	Appears only as a form field (p.1)	First-class CTA: hero secondary, form alternative, sticky mobile bar, final CTA	Add WhatsApp CTAs in 4 locations + a wa.me link spec
Urgency	None (0 intake mentions)	Honest rotational-intake mechanic in announcement bar + final CTA	Add "Next rotational intake starts [MONTH]" (real date, monthly update)
Form microcopy	Only a legalistic disclaimer line	4 beats: free · no obligation · reply ≤1 business day · details never shared	Add the microcopy line under the submit button
Success state	Not specified	Confirmation + WhatsApp deep-link + response time	Specify in handoff
Proof placement	Stories & testimonials empty; stats early	Named proof before the fees section	Fill \$stories with 2-3 permissioned GCC stories; keep the stats strip but make it a recognition strip
Comparison table (Flexible vs Traditional)	Present — good device	—	Keep; sharpen the "Fee structure" row to name AED instalments

8. Improvement Plan — priority-ordered

P0 — Must fix before any build (1-2 day writer pass)

- Fix all mechanical defects: 11× “programmed”→“programmes”, “memes”→“programmes”, “your educational.”, “You need not have to...”, ASK Quotient sentence, “Boost your leadership... path”, AED number formatting, hyphens (2-3, 3-4), capitalisation (Industries), terminology standardisation (programmes / Master's / one duration per family).
- Resolve the duration contradiction: ONE duration statement per family (MBA 10-15m? MSc 8-18m? Exec 12-18m?) — client to confirm, then update hero, fees table and comparison table to match.
- Add the Recognition strip after the hero: Ofqual/QUALIFI (diplomas), university-awarded degrees (name UoG where applicable), GAU IACBE/YÖK/YÖDAK, London HQ + Sharjah office, since 2012. This is the page's single biggest trust fix.
- Add the no-visa line to the hero + one FAQ (K6): “Online routes need no student visa.”
- Cut keyword stuffing by ~40%: each keyword family gets one home (see §4 rule); delete the 3 verbatim-repeated “Whether you're looking for...” blocks; delete repeated “subject to programme availability” hedges.
- Reduce hero form to 5 fields (drop qualification, specialisation, start timing).
- Change first-touch CTA from “Apply Now” to “Start my enquiry / Get my programme & fee plan”.
- State the awarding body explicitly for the Global MBA (UCA + Rushford route) — “degree awarded by [X]”.

P1 — High value, fix in the same pass (writer + client)

- Make the hero + Programme Overview experience-GCC (not keyword-GCC): one local line per H3 — AED, weekend/Saturday classes, Sharjah office, Dubai time zone, Gulf sector examples in specialisations (real estate, hospitality, healthcare, energy, logistics). Specs in §3.2.
- Write the two empty proof sections: 2-3 success stories (Before→After, named, GCC where possible) + 3-4 permissioned testimonials. (Client to supply; permissions mandatory.)
- Add the missing Problem section (4 pains: AED 87k+ premium fees · 24-36-month clocks + residential travel · the fast-track trust swamp · the home-country attestation question) — copy exists in the approved Gulf content package and can be adapted.
- Add a People block (founder + admissions + faculty) — named humans beat institutional pages in this market.
- Add the 4-step How-it-works (enquire → match → enrol into next intake → study & finish) + the honest intake-urgency line (announcement bar + final CTA).
- Verify or delete all stats (4,500+ / 1,500+ / 10+ / 120+ / 98.70% / 5-star / AED range) with the client; date-stamp verified data.
- Add meta title/description + JSON-LD (Course, FAQPage, EducationalOrganization) to the handoff.
- Trim specialisations lists to 8-12 items with links; fix the double-titled H2; demote the hero H2 to a paragraph.

P2 — Polish (before publish)

- Run the final copy through a plagiarism checker (Copyscape) as insurance — no action expected based on §6.
- Read-aloud pass for tone: remove remaining “subject to...” hedges (keep one in fees), shorten sentences >30 words.
- Add footer spec (Sharjah office address, London HQ, UAE + London phone, WhatsApp, registration no., legal links).
- Specify visual assets per section (per the approved Visual Direction Guide) and the sticky mobile bar (WhatsApp + Apply) in the handoff.
- A/B seeds to set: H1 (current vs “A UK master's degree, without leaving the Gulf.”), primary CTA label, hero form vs CTAs-only.

9. Final Verdict & Sign-off

Content quality: 5.0/10 — complete in coverage, unfinished in execution. Structure 6/10 · GCC basis (Hero 6, Programme Overview 5.5) · SEO 5/10 · word quality 4/10 · copyright 8/10 (low risk, no direct copying found) · CRO 4.5/10 · trust & compliance 4/10.

The draft's foundation is sound: right market, mostly right keywords, honest fee structure, a genuinely useful FAQ set, and no evidence of copied material. It fails the SOP gates on (1) mechanical quality, (2) the recognition story, (3) GCC experiential depth, and (4) empty proof sections. One bounded P0 pass + the P1 items above brings it to a build-ready state — estimated 2–3 working days including client confirmations.

SIGN-OFF — QA & Review Agent (Agent 11) · 2026-09-09

Status: NOT approved for build. Return to writer with P0 list. Re-audit after revision (Gate 3a).
