

Bachelors Landing Page Standard Operating Procedure

GCC / UAE Edition — v2.0

Maverick Business Academy (London) · UAE office: Robot Park Tower, Sharjah

Companion deliverable: 02 — Bachelors Keyword Research (GCC / UAE)

Supersedes nothing — extends the London LP SOP v1.0 with bachelors-specific gates.

READ FIRST — project status

SCOPE — This SOP governs the full research → ship pipeline for the UAE/GCC Bachelors landing page (BBA / BSc / BA (Hons) / top-up routes). The Masters MBA & MSc LP is ON HOLD while the client's content writer completes the draft (audit report v1.0 issued — P0 revision list in landing-page/gulf-masters/content-audit-report.pdf). Do not start masters build work until that revision passes re-audit (Gate 3a).

Item	Value
Owner	Project Orchestrator
Date / Version	2026-09-11 · SOP v2.0 (Bachelors, GCC/UAE)
Inputs	02-keyword-research-bachelors-gcc-uae.md · uploads/listing.pdf (program catalogue) · docs/mlp-design-system.md · live site audit (routes/web.php, global-bachelors-pathway)
Existing assets on live site	/global-bachelors-pathway (EUROPE-focused — Hungary/Romania/Moldova; keep, do NOT rewrite for UAE) · /pathway-programs · /masters-pathways · /online-mba-masters-uae (on hold)
Sign-off chain	Orchestrator → client (fees/claims only) → QA re-audit

1. Purpose & Role Map

This SOP converts the research→ship process proven on the London landing page and the Gulf Masters LP into the repeatable pipeline for the Bachelors LP. Each phase has a GATE — do not advance until its checklist is signed. The 11-agent role map is unchanged; small teams may fold roles, but the phases are not optional. New in v2.0: two bachelors-specific gates (two-audience tone check; recognition-fact sourcing) and the Masters-LP-lessons carried over from the content audit (recognition strip before fees; one duration per family; no verbatim keyword blocks; claims whitelist).

#	Role	Owns (bachelors context)
---	------	--------------------------

#	Role	Owns (bachelors context)
1	Project Orchestrator	Coordination, gate sign-off, final package
2	Market & Audience Research	3 personas (fresh 12th-pass + parent, working professional, top-up candidate), pains, GCC market context
3	Competitor Analysis	Campus premium vs online agents vs fast-track mills matrix (price-anchored)
4	SEO & Keyword Research	Keyword map + meta + schema (see 02 doc)
5	Brand Positioning & Messaging	UVP, pillars, two-audience tone (student + parent), CTA language
6	Structure / UX	16-block blueprint (§6), CTA architecture
7	Content Strategy & Copywriting	Section-wise copy; keyword homes; claims whitelist
8	CRO	Form ≤ 6 fields, WhatsApp rail, intake urgency, A/B roadmap
9	Visual & Creative Direction	Design-system compliance (docs/mlp-design-system.md), imagery direction
10	SOP Documentation	Process capture, template maintenance
11	QA & Review	Gate 8 checklist (mechanical, copyright, claims, structure, mobile)

2. PHASE 0 — Brief (input contract)

Gate 0: the brief below is filled for THIS project. Any blank — resolve before research starts. Fee state and claims are the two blanks the client must close; everything else is internal.

PAGE BRIEF v1 (Bachelors, GCC/UAE)

Page purpose (one sentence, conversion-specific): Convert UAE/GCC prospects into qualified bachelors enquiries (form + WhatsApp) for UK-awarded and partner-university undergraduate routes.

Primary conversion: hero 5-field form → admissions counsellor call within 1 business day. Secondary: WhatsApp (wa.me) click. Tertiary: brochure/fee-plan PDF download.

Primary persona: fresh 12th-pass / early-career (18–22) with the PARENT as co-decision-maker and payer. Others: working professional (22–32) upgrading; top-up candidate (diploma/HND/credit) seeking a fast recognised completion.

Products: BBA (RBS — 7 specialisations) · BSc (GAU — 13 programmes) · BA (Hons) Global Business (UWS, UK) · top-up route to UK honours degree (Ofqual QUALIFI → UoG/UCLan — confirm partners with client). Duration/fees: PLACEHOLDER (client to confirm — never publish [FEE]).

Proof assets: listing.pdf catalogue · Sharjah office (Robot Park Tower) · London HQ (since 2012) · [testimonials: NEEDED — no permissioned bachelors stories on file; masters page templates exist but must not be reused]

Competitors: S P Jain Dubai · Middlesex Dubai · UOWD (campus premium) · Global Learners / Westford / LUBM / King's Business School UAE (online agents) · Ascencia (1-yr fast-track) · educations.com + coursetakers.ae (directories) · Fateh/AECC/bradfordia (agent SEO content).

Brand assets: docs/mlp-design-system.md · live site layouts (cinematic-hero component reused from /global-bachelors-pathway).

URL (proposed): /bachelors-dubai-uae — links OUT to /programs/{slug}, /global-bachelors-pathway (Europe rail), /online-mba-masters-uae (post-bachelors rail, once live); links IN from /pathway-programs + footer + EU pathway page cross-link.

Fee state: PLACEHOLDER — rule: no [FEE] text may ship; comparison table may show competitor-verified anchors only.

Deadline: T+10 working days to QA gate. Sign-off: Orchestrator + client (fees/claims).

3. PHASE 1 — Research (Agents 2, 3, 4)

3.1 Market & audience (Agent 2)

- Market frame: UAE has 400+ listed bachelor's programmes (bachelorsportal 2026: 297 BSc, 91 BA, 46 BBA, 46 BEng). Campus tuition AED 35k–65k/yr (Fateh, Jan-2026; ≈ INR 7.7L–14.5L for the Indian-expat majority). Supply

is deep; TRUST is scarce.

- The structural gap: nearly every SERP result for bachelors queries is (a) a campus-premium branch campus, (b) an agent directory, or (c) a 12-month/1-year “BBA” fast-track (observed AED 3,500–25,000). Nobody credible sells a UK-awarded, online-friendly, weekend-tolerant bachelors route with a physical Gulf office.
- Personas (3): P1 fresh 12th-pass + parent (fear: is it real / recognised / worth it; channel: WhatsApp, Facebook, school networks; decision = parent pays, student experiences). P2 working professional 22–32 (fear: career gap, time; channel: LinkedIn, Google; decision = self + employer support). P3 top-up candidate (fear: credit acceptance, duration; channel: Google exact-match; decision = fast + cheap + recognised).
- Regulatory facts to carry (source-dated, verify before publish): UAE MoE began recognising online degrees July 2023 (exclusions: Engineering, Medicine, Law) — via MOE press/vitalconsular commentary; MOHRE accepts accredited online/distance degrees for work permits (MOHRE guidance, 2026); MOHESR equivalency needed only for government roles, Golden Visa professional category, regulated professions. Phrase as “recognised for private-sector use; confirm your category with an advisor” — never “guaranteed visa”.
- Implications: message hierarchy = (1) real, named universities → (2) no visa / stay in your city → (3) flexible (weekend/online) → (4) AED + instalments → (5) local office + human counselling. Tone: confident and parent-safe, zero “fast-track” language, zero “best/guaranteed”.

3.2 Competitor matrix (Agent 3) — verified anchors, dated 2026-09

Tier	Players	Price anchors (as listed)	Their weakness we exploit
Campus premium	S P Jain Dubai, Middlesex Dubai, UOWD, Amity Dubai, Curtin Dubai	S P Jain BBA online AED 100,000 / 4 yrs; campus band AED 33k–110k (coursetakers fee table); AED 35k–65k/yr (Fateh)	Relocation/visa + cost + 3–4 yrs; not student-life for working Gulf professionals
Online agents (directories + dual-qualification)	Global Learners (11 online bachelors, Sharjah), Westford (LJMU-awarded), LUBM, King's Business School UAE	King's BBA 12 months; Global Learners BBA 2 yrs “dual-qualification”	No physical Gulf academy behind them; dual-qualification framing is confusing; awarding body buried
Fast-track mills	Ascencia (1-yr “WES approved” BBA), Study Wink (BBA AED 7,999 / 3 yrs), Sama (AED 3,500), Tamkeen (AED 22,500 / 12 mo)	AED 3,500–25,000 total; 1–3 yr “BBA”	Recognition risk is the product's whole story; no counselling, no campus, no accountability
Agent SEO content	Fateh, AECC, globaltree.in, bradfordia, Times College, leverageedu	n/a (lead-gen content)	Content farms, not academies — we out-trust with named universities + office

3.3 SEO (Agent 4)

Deliverable: 02-keyword-research-bachelors-gcc-uae.md (8 primary keywords K1–K8 + LSI cluster, meta candidates, Course/FAQPage/EducationalOrganization schema, on-page placement rules, price-anchor table). Gate 1b: every K must map to at least one page location BEFORE copy starts.

4. PHASE 2 — Positioning & Messaging (Agent 5)

UVP (working)

“A real undergraduate degree — from named UK and partner universities — that fits a Gulf life: no student visa, weekend-tolerant delivery, AED pricing with instalments, and a human admissions team in Sharjah who knows attestation, MOHRE and your career move.”

Five pillars (in page order)

Pillar	Claim (whitelisted phrasing)	Proof on page
Recognition	UK-awarded & partner-university degrees; Ofqual-regulated diploma route; UAE MoE has recognised online degrees since 2023 (excl. Engineering/Medicine/Law)	Recognition strip: university names + reg. bodies; source-dated notes
No visa / stay put	Online routes need no student visa; study from Dubai, Sharjah, Abu Dhabi or anywhere in the GCC	Hero sub + FAQ + MoE/MOHRE note (private-sector phrasing)
Flexible	Weekend-tolerant scheduling, online/hybrid delivery, rotational intakes	How-it-works + programme cards (delivery column)
Affordable & honest	AED pricing, instalment plans; comparison vs campus AED 35k-65k/yr and vs 12-month mills	Fees section + comparison table (client-confirmed figures)
Local accountability	Sharjah office (Robot Park Tower) + London HQ since 2012; counsellor call within 1 business day	People block + footer + success-state promise

Two-audience tone rule (bachelors-specific, NEW in v2.0)

Every major section must pass BOTH ears: the student hears ambition and flexibility; the parent hears safety, recognition and cost control. QA checks: “does any paragraph read like a 19-year-old would only click it (too casual) or a 45-year-old would not read it (too hyped)?” No slang, no “dream come true”, no unquantified “world-class”. Parent-fear lines (recognition, attestation, what-employers-say) get their own FAQ homes.

5. PHASE 3 — Structure: the 16-block blueprint (Agent 6)

Order is conversion logic: trust before fees, recognition before claims, proof before the ask. Blocks 3-4 are MANDATORY after the hero (lesson from the Masters LP audit — the recognition gap was the #1 trust failure).

#	Block	Content spec	CTA
1	Announcement bar	Next intake [MONTH — client date] + “No student visa needed for online routes”	—
2	Nav	Logo · Programmes · Recognition · Fees · FAQ · [WhatsApp icon] · [Start my enquiry]	Primary CTA
3	Hero	H1 (K1 phrase lands in subhead — see 02 §4); 4 trust chips: UK-awarded · No student visa · Weekend-tolerant · Office in Sharjah; benefit sub for BOTH audiences; dual CTA	Form + WhatsApp
4	Recognition strip	Named: University of the West of Scotland (UK) · University of Gloucestershire (top-up — confirm) · Rushford Business School · Girne American University (IACBE) · Ofqual/QUALIFI diploma route · MoE online recognition (2023) · London HQ + Sharjah office · since 2012	—
5	Problem section	Parent fears (is it real? attestation? what will employers say? cost blow-up) + student fears (12-month mills, visa hassle, 3-4 yr campus grind, family far away)	—
6	Who it's for	3 persona cards → each links to its route (BBA / BSc / BA Hons / Top-up) — routes from listing.pdf	Card CTA
7	Programme overview	Family-level: BBA (RBS, 7 spec) · BSc (GAU, 13 prog) · BA (Hons) Global Business (UWS) · Top-up (QUALIFI L5/L7 → UK honours) — duration + delivery per family (ONE duration per family — no mixing)	—
8	Programme grid	Full specialisation list (from listing.pdf) with “most in-demand” flags; filter by delivery	Enquire
9	How it works	4 steps: Enquiry → counsellor call (≤ 1 business day) → documents + intake → start; intake calendar strip (rotational)	Form
10	Recognition & careers	MoE/MOHRE/attestation explained honestly (UK apostille/FCDO route); career outcomes per family (roles, not salary promises)	—
11	Fees & funding	AED + instalments (client figures); comparison table: campus AED 35k-65k/yr · 12-month mills AED 3.5k-25k · Maverick [confirmed band]	Fee plan

#	Block	Content spec	CTA
12	Comparison table	Flexible online (Maverick) vs traditional campus vs 12-month fast-track — rows: recognition, visa, time, cost, counselling, progression to MBA	—
13	Proof	2-3 NAMED permissioned stories (bachelors-specific — no reuse from masters page), verified stats only (4,500+ etc. need source), Sharjah office photos	—
14	People	Admissions team photos + names, Sharjah office (Robot Park Tower) map pin, London HQ line, “since 2012”	WhatsApp
15	FAQ	10 Q&As, 1:1 with FAQPage schema — homes: recognition, visa, duration, fees/instalments, working while studying, top-up, attestation, intakes, progression to MBA, parent question	—
16	Final CTA + form	5 fields: name · phone/WhatsApp · email · programme · country; microcopy 4 beats; success state: “Counsellor will call within 1 business day” + WhatsApp deep-link; footer (contact, legal, EU pathway + masters links)	Form

6. PHASE 4 — Content & Copy (Agent 7)

Copy rules (hard gates)

- Keyword homes: each K1-K8 appears in its assigned locations (02 §4) and NOWHERE else as a block. No sentence template may repeat verbatim in more than one section (the Masters audit caught “Whether you're looking for...” ×4 — that is a P0).
- One duration per programme family — durations come ONLY from the client-confirmed table (Phase 0 blank). If unconfirmed at draft time, write the delivery model, not the number.
- Claims whitelist: only (a) facts from listing.pdf, (b) source-dated public facts (MoE 2023, MOHRE, competitor published prices — always dated), (c) client-verified stats with source. No “best / top / #1 / guaranteed / 100%”. No salary figures.
- Recognition precision: regulated diplomas = Ofqual/QUALIFI (diplomas ≠ degrees); honours degrees = named awarding university per route. The phrase “UK-recognised” may only mean (i) awarded by a UK university or (ii) Ofqual-regulated — define which, per occurrence.
- Placeholders: [FEE], [Student Name], [MONTH], [Add visual] are draft-only. Gate 8 greps for them — any hit = P0 reject.
- Typos: run the mechanical pass before review (the Masters draft had “programmed” ×11 and “program memes” — both P0). Standardise: programmes (UK), programme, bachelors vs bachelor's consistent (apostrophe in noun “bachelor's degree”; no apostrophe in “bachelors” as attributive).
- Geo naming: Dubai, Sharjah, Abu Dhabi each named ≥ once in H2s or first 100 words; GCC ≥ 2×; AED in fees; INR framing only in a parenthetical for the Indian-expat rail (≈ INR xL — verify rate, date it).

Deliverable format

Markdown source (03-bachelors-landing-content-gcc-uae.md) with 16 numbered sections, each carrying: keyword homes used, claims referenced (whitelist ID), CTA, and [PLACEHOLDER] tags. This exact format is what QA Agent 11 audits block-by-block.

7. PHASE 5 — CRO (Agent 8)

Element	Standard	Note
Form fields	5 max: name, phone/WhatsApp, email, programme, country	Drop qualification/start-timing to the call (Masters lesson)

Element	Standard	Note
First-touch CTA	"Start my enquiry" / "Get my programme & fee plan"	Never "Apply Now" pre-call (unearned decision)
WhatsApp rail	Sticky mobile bar + hero secondary + 3 mid-page mentions + wa.me link in final CTA	Gulf default channel — treat as co-primary conversion
Urgency	Real intake dates only: "Next rotational intake starts [MONTH]" (monthly update)	No fake countdowns
Microcopy	4 beats under submit: free · no obligation · reply ≤ 1 business day · details never shared	
Success state	"Counsellor will call within 1 business day" + WhatsApp deep-link + fee-plan download	Specified handoff, not a dead thank-you
Sticky nav CTA	Appears after hero scroll; form scrolls to block 16	
A/B seeds (post-launch)	H1 benefit vs K1-exact · 5-field vs 4-field · form-first vs WhatsApp-first hero	Log in 07-CRO doc
Instrumentation	GA4 + events: form_start, form_submit, wa_click, tel_click, pdf_download; UTM pass-through from ads	Zapier → WhatsApp/Zoho per docs/zapier-instruction.md

8. PHASE 6 — Visual & Creative (Agent 9)

- Design system: docs/mlp-design-system.md is the single source (colors, type scale, spacing, component specs). The live site's cinematic-hero component (reused on /global-bachelors-pathway) is the approved hero shell — restyle, don't reinvent.
- Imagery direction: (a) Gulf student life — laptops in cafés/home offices, Dubai/Sharjah skyline at dusk; (b) real office photos (Robot Park Tower — client to supply, no stock of "our office"); (c) university/partner campus shots only with permission. Never stock photo of one stock "diverse graduate" group as hero.
- Recognition strip = logotype row (only for institutions the client confirms may show the mark — otherwise text-only names; using a university logo without permission is a P0).
- Motion: scroll-reveal per docs/mlp-scroll-reveal-fix.md; hero particle/scanline effects kept from the shared component; Lighthouse mobile ≥ 90 is a gate, not a goal.
- Accessibility: contrast AA on all tinted boxes; form labels visible (not placeholder-only); FAQ native <details> or accessible accordion.

9. PHASE 7 — Build (integration)

- Stack: Laravel 11 + Blade, same pattern as /global-bachelors-pathway — route + Filament-managed SEO fields (gbp-style model: meta_title, meta_description, custom_body_scripts), page partials in resources/views/pages/bachelors-dubai-uae/.
- Route (proposed): Route::get('/bachelors-dubai-uae', [PageController::class, 'bachelorsDubaiUae'])->name('bachelors-dubai-uae'); — confirm slug with client before build (URL is a K1 commitment: /bachelors-dubai preferred if client accepts).
- Schema (JSON-LD): Course per family (BBA / BSc / BA Hons / Top-up) with courseMode Online/Hybrid, provider, duration (only when confirmed); FAQPage (10 Q&As 1:1); EducationalOrganization with Sharjah (Robot Park Tower) + London addresses, areaServed [UAE, SA, QA, OM, KW, India, Philippines]; BreadcrumbList.
- Cross-links: from /pathway-programs + footer + /global-bachelors-pathway (add "Preferring to stay in the Gulf? Bachelors in the UAE" rail) → to /programs/{slug} per family + /online-mba-masters-uae (when un-held).
- Form endpoint: existing admissions pipeline (Zapier/Zoho per docs/) — no new backend; success-state copy per Phase 5.
- Assets: Cloudinary per docs/cloudinary-guide.md; images ≤ 200KB webp, lazy below fold.

10. PHASE 8 — QA Gates (Agent 11)

Gate 8a — structure & GCC basis

- 16/16 blocks present, in order; recognition strip is block 4 (after hero, before any fee mention).
- Hero + Programme Overview are UAE/GCC-based (the explicit client check): Dubai/Sharjah/Abu Dhabi named; no-visa promise present; GCC ≥ 2×; no London-only framing.
- Every persona card routes to a real programme in listing.pdf.

Gate 8b — mechanical (the Masters-draft trap list)

- Grep the copy: “programmed” (as noun) = 0; “programmes/programs” consistent; no double-negatives; no sentence fragments under H3s; “subject to programme availability” ≤ 1 occurrence; verbatim-identical sentence across ≥ 2 sections = 0.
- Placeholder sweep: [FEE], [Student Name], [MONTH], [Add], [TBD] = 0 in publish build.
- Duration audit: each family has exactly one duration, matching the client-confirmed table.
- Copyright: distinctive multi-word strings spot-checked vs web + full grep vs own repo (blade/md) — no verbatim internal duplication; Copyscape pre-publish (cheap insurance, log result).

Gate 8c — claims & compliance

- Every stat/claim maps to a whitelist ID with source + date; unverified → removed or softened.
- MoE/MOHRE/MOHESR statements use the source-dated phrasing from §3.1 (no “visa guaranteed”, no “fully recognised for all purposes”).
- No university logo without permission; awarding body named per route (UCA+RBS pattern from masters audit).
- Two-audience tone pass (student + parent ears) signed.

Gate 8d — technical

- Form = 5 fields, validated, success state live; WhatsApp/tel links open correctly; mobile 360px pass; Lighthouse mobile ≥ 90; meta title ≤ 60ch / description ≤ 155ch (02 §2 candidates); JSON-LD valid (Course + FAQPage + Org + Breadcrumb).

Gate 8e — sign-off loop

QA issues are graded P0 (blocks build: typos, contradictions, placeholder leaks, unverified claims, recognition gap, form spec) / P1 (quality: tone, proof depth, SEO homes) / P2 (polish). P0 = hard stop; revision → re-audit (Gate 3a for masters, Gate 8 re-run for bachelors). Sign-off line goes in the QA report footer exactly as in the masters audit: date, agent, status (APPROVED FOR BUILD / NOT APPROVED), next gate.

11. Timeline & Deliverables

Day	Milestone	Deliverable / Gate
D0	This SOP + keyword research signed	01-SOP.pdf, 02-keyword-research (Gates 0+1b)
D1-D2	Research complete (market, personas, competitor refresh)	03-research-bachelors-gcc.md (Gate 1)
D3	Strategy + messaging + wireframe	04-messaging + 05-wireframe (Gate 2)
D4-D5	Full copy, 16 blocks, keyword homes	06-bachelors-landing-content-gcc-uae.md (Gate 3)
D5	CRO spec + visual direction	07-cro + 08-visual (Gate 4/5)
D6-D8	Build (Blade partials, route, schema, form wiring)	Branch PR with preview URL (Gate 6)
D9	QA audit — PDF report (same format as masters audit)	09-qa-audit-report.pdf (Gate 8)
D9+2	P0 fix + re-audit	APPROVED FOR BUILD sign-off (Gate 8e)
D10	Ship + instrumentation + watch list	Live URL, GA4 events verified

Client dependencies (float the list to the client at D0): (1) confirmed durations per family, (2) AED fee bands + instalment plan, (3) permissioned bachelors testimonials x2-3, (4) Sharjah office + team photos, (5) logo-use permissions, (6) intake calendar, (7) top-up awarding-body confirmation (UoG/UCLan). Every blank above is a P0 blocker at Gate 8 — not a nice-to-have.
