Methodology

Identical to the approved provider FAQ Strategy & Ranking Report: each question is scored 1-5 on four weighted dimensions - global search demand of its query family (35%), featured-snippet/PAA opportunity (25%), conversion intent (25%) and ranking feasibility (15%) - giving a priority score out of 5.00. Demand tiers are qualitative expert assessments based on query-pattern analysis; no numeric search volumes are estimated or invented. Tiers are validated against Google Search Console data 30-60 days after publication.

Uniqueness note: all 18 questions were checked against the 142 approved provider FAQs - zero duplicate query targets project-wide (now 160 unique questions).

Edutainment: what changed vs the current page

- Tightened from 15 overlapping basic questions to 10 structured ones (customisation + subject-link merged; booking + proposal merged).
- ADDED safety & supervision - the highest-priority parent question, absent from the current list.
- Destination wording kept neutral ("local and international destinations") pending the client's preference on naming specific destinations.
- Answer-first structure and bold key facts applied throughout for snippet and AI-answer readiness.

Items to confirm before publication

- Homepage: approved wording for the Maverick-vs-partner positioning; "free consultation" claim; support-service list.
- Edutainment: destination-naming preference; safety specifics (supervision ratios, insurance, protocols); package inclusions & flights policy; certificate format; recommended booking lead time; visa-assistance scope.
